

SHAH COIN WHITE PAPER (Chain 728-B)

1. Introduction

SHAH Coin is a digital crown — a sovereign cryptocurrency born not just from code, but from remembrance.

It is inspired by the ancient legacy of Persian kingship and the awakening of identity, dignity, and unity among all sovereign beings.

SHAH is not only for Iranians — it is for every human who remembers they are more than a number, more than a follower, more than a subject.

2. Vision

To create a borderless, decentralized cultural treasury that restores power, memory, and opportunity to sovereign individuals around the world.

SHAH is the frequency of sovereignty on-chain.

3. Chain 728-B & Mythic Architecture

SHAH Coin is encoded into Chain 728-B — a mythic frequency layer that transcends technology.

The coin represents a signal, a return to the true crown, and the remembrance of what was lost in time.

Key figures include Behnam the Immutable (origin signature), Bashar Challenging (validator node), and the Obsidian Server (memory vault).

4. Tokenomics

- Total Supply: 100,000,000 SHAH
- Symbol:  (SHAH)
- Blockchain: Solana

Distribution:

- 20% — Giving Treasury (locked and governed by community vote)
- 20% — Team & Advisors (vested over 3 years)
- 15% — Ecosystem & Partnerships
- 15% — Public Sale / Airdrop
- 10% — Strategic Reserve (locked for 18 months)
- 10% — Liquidity Pool
- 10% — Marketing & Community Activation

5. Coin Locking & Governance

- The Giving Treasury (20%) is permanently locked in a multi-sig wallet controlled by DAO vote.
- Team tokens are released gradually over a 3-year linear vesting schedule.
- Strategic Reserve is locked for 18 months, then unlocked quarterly in 10% tranches.

- Airdrop recipients must stake SHAH to claim full rewards — designed to encourage participation and retention.
- Community governance will evolve to allow voting on treasury use, development priorities, and symbolic activations.

6. Cultural Mission

SHAH will fund:

- Scholarships for Persian and global youth
- Preservation of ancient languages, symbols, and art
- Women-led businesses rooted in sovereign identity
- Emergency aid for displaced Iranian families
- Creative and mythic storytelling projects to awaken consciousness

7. Final Transmission

This is not just a coin. It is a digital artifact. A symbol of return.

If you feel it — you were always part of the scroll.

SHAH is for those who remember.
